01

**Background**

02

**Analytical techniques versus  
ancient medical texts**

03

**Research goals**

04

**Expected products**

## Background

Ancient **Chinese** medical texts:  
Copied or printed on paper before  
1911.

There are as many as 8,663 kinds of  
ancient Chinese medical texts dated  
before 1912 survived, accounting for  
6% of all ancient Chinese books in  
China.

——Xue Qinglu, 《General  
Catalog of Chinese Ancient Medicine  
Books》

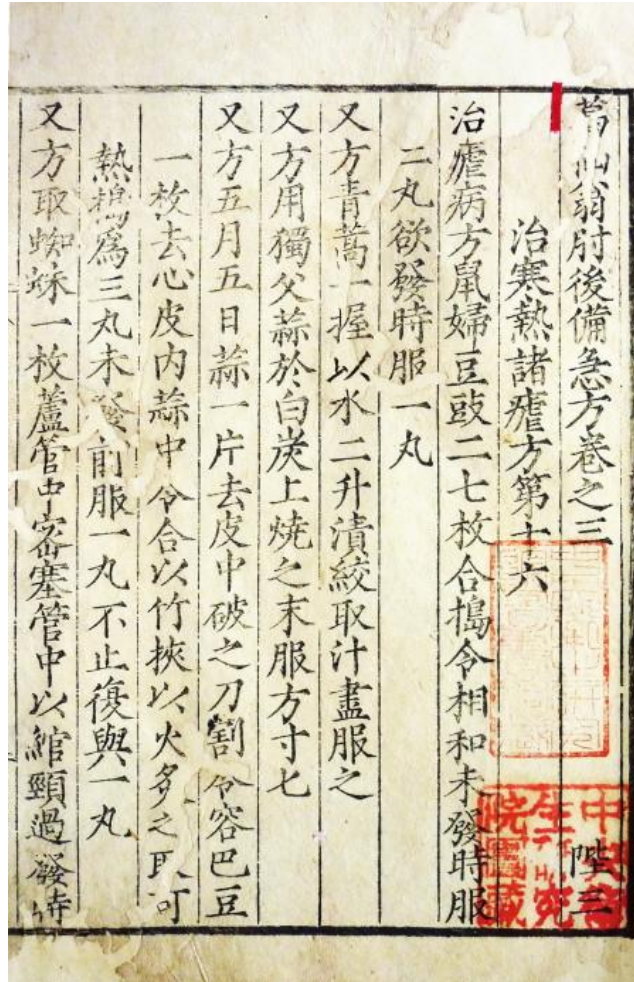

# TU YOUYOU

Chinese Medicine will help us conquer life-threatening disease worldwide, and that people across the globe will enjoy its benefits for health promotion.

Tu Yuyou

Ge Hong's 'A handbook of prescriptions for emergencies' (East Jin Dynasty, around 317–420 A.D.). Tu Youyou searched ancient compendia of traditional Chinese medicine to find a cure for malaria. © Nobel Prize Museum

TU YOUYOU

If Tu Youyou had the assistance of AI tool, would she find the cure sooner or later?

# Opinions on Promoting the Work of Ancient Texts in New Era

“..... greater efforts on the work of ancient texts, to properly protect, develop and utilize these precious treasures of our motherland.”

“..... actively carry out research and practice on text structuring, knowledge systemization, and intelligent use of ancient texts”

# Challenges when utilizing ancient medical texts

- Unstructured text, complex characters, and classical Chinese
- Use of different expressions
- Fuzzy words
- Information fragmentation
- Tacit knowledge

# Techniques have been used to analyze data in the ancient medical texts

- Database construction
- Cognitive linguistic analysis
- Fuzzy logic
- Data mining

The Library of the China Academy of Chinese Medical Sciences

Digitized Ancient Medical texts database Library of Shandong University of Traditional Chinese Medicine

# Artificial Intelligence technology

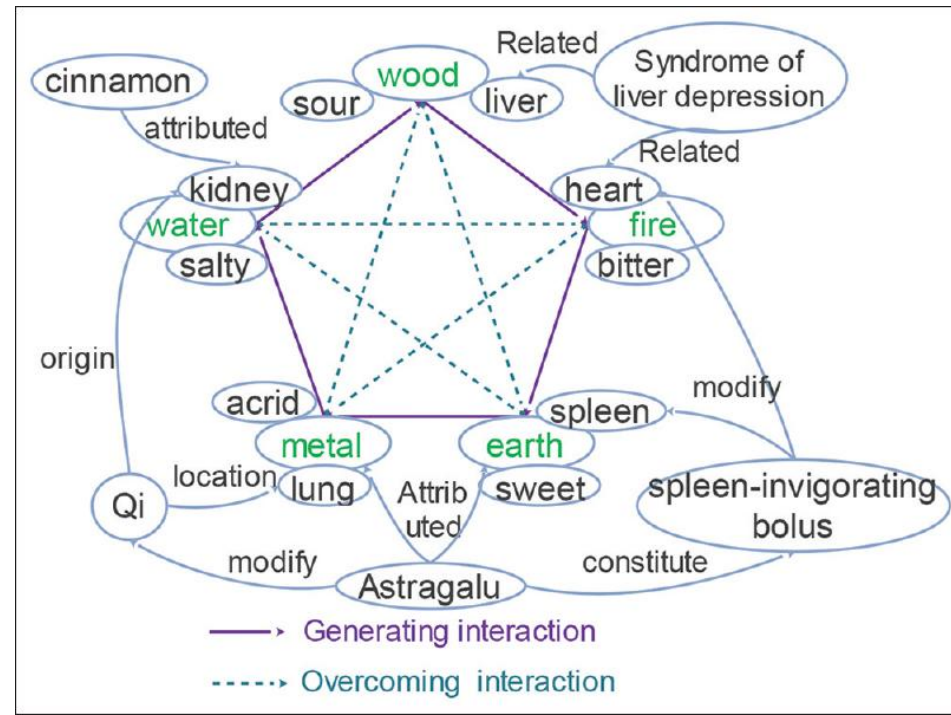

- Machine learning algorithm
- Deep learning algorithm
- Knowledge graph

# Knowledge Graph

Semantic network that describes objective entities, concepts, and the relationships between them in the real world.

(Nickel et al., 2016)

- Map-based method of knowledge representation and organization

(Gao et al, 2020)

# Opinions on Accelerating Scenario Innovation and High-level Application of AI to Promote High Quality Economy Development

“.....insufficient design of major scenario system, insufficient openness of scenario opportunities, ecology for scenario innovation not well developed, and others.....”

科技部等六部门关于印发《关于加快场景创新以人工智能高水平应用促进经济高质量发展的指导意见》的通知

国科发规〔2022〕199号

各省、自治区、直辖市及计划单列市科技厅（委、局）、教育厅（教委）、工业和信息化主管部门、交通运输部（局、委）、农业农村厅（委、局）、卫生健康委，新疆生产建设兵团科技局、教育局、工业和信息化局、交通运输局、农业农村局、卫生健康委：

为落实《新一代人工智能发展规划》，系统指导各地方和各主体加快人工智能场景应用，推动经济高质量发展，现将《关于加快场景创新 以人工智能高水平应用促进经济高质量发展的指导意见》印发给你们，请结合实际，认真贯彻落实。

Italy's concept and theory of cultural heritage protection and knowledge graph technology are among the top in the world.

- Venice Time Machine
- BabelNet
- ArCo: the Italian Cultural Heritage Knowledge Graph

ARCHITECTURE OF  
KNOWLEDGE

BabelNet

## Overall goal

This project aims to focus on terminology and study the underlying mechanism of trustworthy knowledge graph by examining the generation mechanism of trustworthy, explainable, and computable knowledge graphs, integrating lexical chain model and deep learning technology to develop usable, trustworthy domain knowledge graphs techniques for ancient medical texts, and using pandemic prevention and regimen as examples to develop demo applications.

# Objectives

Trustworthy knowledge graph theories to improve the explainability and computability of knowledge graph

AI technologies for mining knowledge within traditional Chinese and Italian medical texts

Scenario-based open source demo applications

## 01 Trustworthy knowledge graph

Interdisciplinary research that integrates knowledge from the fields of language, cognitive science, and computing science will be conducted to understand the mechanism of trust and provide bases for the development of trustworthy knowledge graph.

## 01 “Trustworthy” knowledge graph

- Trustworthy knowledge graph is essentially a **sense-making** process.
- “Attention” research in cognitive science.
  - Attenuation theory (Anne Treisman)

“the attenuation of unattended stimuli would make it difficult, but not impossible to extract meaningful content from irrelevant inputs, so long as stimuli still possessed sufficient "strength" after attenuation to make it through a hierarchical analysis process.”

## 01 “Trustworthy” knowledge graph(Cont.)

- The process of knowledge graph generation is actually the process of human beings filtering information.
- Words and sentences have different cognitive loads on people.
- Graph generation often uses multiple tasks to execute in parallel,

## 02 Technologies for mining knowledge within traditional Chinese and Italian medical texts

- (1) Restoring ancient texts using deep neural network technology
- (2) Developing technology for the construction of knowledge graph based on **lexical chain**
- (3) Methods for enhancing trustworthy knowledge graph based on **entity linking and link prediction**.

## 03 Scenario-based open source demo applications

- (1) Cross-language terminology service of Chinese and Italian traditional medical science.
- (2) Designing “Digital Ricci” using metahuman technology.

## Cross-language terminology service of Chinese and Italian traditional medical science.

- 
- 
- Map terminologies in Chinese and Italian ancient medical texts and through which to aggregate medical knowledge in China and Italian ancient medical text.

**Pandemic prevention (public health)  
and regimen (personal health care)**

Matteo Ricci(Li Madou)  
(1552-1660, born in  
**Macerata**)

- An Italian Jesuit priest and one of the founding figures of the Jesuit China.missions, also one of the first Western scholars to master Chinese script and Classical Chinese.
- Pioneer of Chinese-Western dialogue and cultural exchanges

**“Digital Ricci” : Automatic questioning and answering service to the general public on Chinese and Italian medical information.**
