20% Discount with Discount Code.

Managing Digital Records in Africa

Edited by **Mpho Ngoepe**, University of South Africa

Managing Digital Records in Africa draws on the research work of the InterPARES Trust (ITrust) project that investigated interrelated archival issues focusing on legal analysis, infrastructure, trust, authentication, and education within the African context.

The book can be used as a premier reference source by private and public organizations, researchers, educators, archivists, records managers, and postgraduate students to make informed decisions about digital records, records management systems, cloud-based services, authenticating records, and identifying universities on the continent that offer archival programmes.

Pre Order on Amazon or your preferred retailer.
